SKILL

JavaScript | TypeScript | Vue/Nuxt.js | Vuex | Composition API | React | Axios | HTML | CSS | SPA | PWA | Responsive Design | Bootstrap Vue | Element UI | Web Pack | Java | Docker | GIT | Agile

LANGUAGES

Persian: Native

English: Fluent

Dutch: Basic / A2

ABOUT ME

A 4 years experienced Front-End Developer with a solid foundation in front-end development and a history of collaboration with renowned companies like Huawei and Ericsson. Holding a BSc in Data Science and Artificial Intelligence, a comprehensive skill set in web development, with a primary focus on Vue, Nuxt, and React. Crafting interactive, responsive websites for all displays is my forte, employing CSS and animation libraries such as Lottie. Proficiency in JavaScript and TypeScript is complemented by adeptness in Git and Docker for collaborative development. Additional expertise extends to the integration of Machine Learning with web analytics.

CAREER HIGHLIGHTS

- Collaborated with APG Company to combine machine learning with Google Analytics data, resulting in the prediction of user dropouts and significant improvements to website UI/UX.
- Optimize stock and inventory management systems, resulting in streamlined processes and improved efficiency for Dutch Beauty Group.
- Conceptualized and developed an internal HR system for Eghtesaad-e Bidaar Brokerage, leading to enhanced payroll management and improved employee satisfaction.

EXPERIENCE

Frontend Engineer / Data Scientist | Altura

2024 – Present — Amsterdam, Netherland

- Developed a machine learning model for document categorization, leveraging techniques such as TF-IDF, Random Forest, cosine similarity, and feature extraction to classify documents associated with tender files.
- Utilized Large Language Models (LLMs) to extract critical tender information, including important dates, summaries, and other key metadata, optimizing natural language understanding pipelines for improved precision and recall.
- Designed and implemented front-end interfaces for AI-driven features, such as chatbots, text editors, and advanced search systems with custom filters, using Nuxt3, TypeScript, HTML, and CSS.
- Enhanced website usability by refining UI/UX components and improving accessibility.
- Analyzed Google Analytics data to identify user behavior patterns, informing strategic updates to improve site engagement and navigation efficiency.

Front End Developer |Vue | Nuxt | Dutch Beauty Group

Oct 2020 – Sep 2023 — Eindhoven , Netherland

- Designed and implemented advanced features, including dynamic table filtering, pagination, and URL-based filter preservation with Vue/Nuxt, resulting in a significant improvement in user experience, functionality, and loading speed.

- Developed reusable React components to enable efficient filtering, sorting, and file uploader validation, providing warehouse employees with enhanced productivity tools and streamlining inventory management processes.

Front End Developer | Eghtesaad-e Bidaar Brokerage

Mar 2018 - May 2020 | Tehran , Iran

- Revamped the stock and inventory management system using Vue JS, Leveraging microservices deployed within Docker containers with a PHP backend.
- Implemented data input forms for registering new buyers and sellers using Vue and Bootstrap-Vue.
- Implement a library “Form validator”, and use lottie to create interactive animation with user.
- Created a Single Page Application for the company blog (Nuxt) to enhance advertising efforts.
- Developed an internal HR system for payroll, leave, and attendance using AngularJS.

EDUCATION

Bsc Data science and Artificial intelligence | Maastricht University

2023 – June 2023 | Maastricht,Netherlands

- **Data Science and Machine Learning**: Python,Natural Language Processing,Spacy, Machine Learning,Pandas,NumPy,Data Visualization,Data Preprocessing ,R,Neural Networks
- **Computer Science and Technologies:** Data Structures and Algorithms, Java, MySQL, Matlab, Docker, GIT, Agile Methodologies, Cloud Computing (AWS, Azure, Google Cloud Platform)
- **Mathematics and Analytic**: Data Analysis, Numerical Mathematics, Probability and Statistics, Semantic Web (RDF, OWL, SPARQL)

Bachelor of Engineering, Urban Planning | Azad University

2010 – 2014 | Tehran, Iran

Diploma of Math and Physics | 13 Aban High school

Tehran, Iran

PROJECTS

NER GDPR Extraction |

- Built NER models (LSTM, SpaCy, BERT) to identify GDPR-related entities in text.

Biomedical Text Analysis |

- Performed keyword extraction and topic modeling using TF-IDF and LDA on biomedical data.

Digital Exit Strategy |

- Modeled user behavior with Word2Vec, DBScan, and Markov Chains to predict web exit patterns.

HONERS

Winner of the Nokhbegan Math Olympiad (Calculus)

2010 | Tehran, Iran

Winner of the Nokhbeegan Math Olympiad (Linear Algebra)

2010 | Tehran, Iran
